PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience across three internships and multiple end-to-end applications built on Java, Spring Boot, React.js, and SQL. Skilled in REST API design, relational data modeling, and secure authentication (JWT, Spring Security). Solved 200+ DSA problems on LeetCode. Seeking a full-time Software Developer role.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python (Basic)

Frontend Technologies: HTML, CSS, JavaScript, React.js

Backend Technologies: Core Java, JDBC, Servlets, Spring Boot, REST APIs, Microservices

Databases: Oracle SQL, MySQL, MongoDB (Basic)

DevOps & Cloud: Git, GitHub, Maven, Docker, AWS, CI/CD Fundamentals

Tools & IDEs: VS Code, IntelliJ IDEA, Eclipse, Postman, Swagger

Core Concepts: OOP, Data Structures, MVC Architecture, API Integration

AI & Productivity Tools: Prompt Engineering, ChatGPT, GitHub Copilot, Claude

PROJECT EXPERIENCE

ScanCrunch – Collaborative Full Stack Project (In Progress) — *React/Vite + Spring Boot (collaborative)*

- Contributing as a team Lead on a collaborative open-source project with a React/Vite frontend and Spring Boot backend.
- Implemented the Email OTP verification module end-to-end and got the pull request merged into the main branch.
- Assigned and actively developing the payment module, working within an existing multi-contributor codebase and issue-tracking workflow.
- Debugged and fixed cross-module integration issues including CORS configuration and API base URL mismatches.

Zepto Clone – Online Grocery Delivery Platform — *Spring Boot, React.js, MySQL, REST APIs*

- Built a full-stack clone of the Zepto grocery delivery app with product catalog browsing, category-wise listings, and real-time cart management.
- Developed secure user authentication and authorization for customer accounts using Spring Security.
- Designed RESTful APIs in Spring Boot to handle product search, cart operations, order placement, and order history.
- Modeled a relational MySQL schema for products, inventory, users, and orders ensuring data consistency.

Online Polling and Voting System — *Spring Boot, MySQL, REST APIs, React.js*

- Built a secure web-based polling and voting platform supporting authenticated users with JWT-based access control.
- Designed a relational database schema ensuring data consistency and secure handling of votes.
- Implemented role-based access control and input validation for application security.

INTERNSHIP EXPERIENCE

Java Full Stack Internship — JSpiders, Bengaluru Feb 2026

Artificial Intelligence Intern — Dewdas Technologies, Bengaluru Jun 2025

Software Developer Intern — HCLTech, Chennai Feb 2025

CERTIFICATIONS

- Artificial Intelligence Internship Certificate – Dewdas Technologies, Bengaluru
- Software Developer Internship Certificate – HCLTech, Chennai
- Certificate in C Programming – Bharathidasan University – First Class with Distinction

EDUCATION

B.Tech – Information Technology, Vinayaka Mission's Kirupananda Variyar Engineering College 2022 – 2026

CGPA: 8.1 / 10
